

I am writing to urge you to reject NAB's petition 04-160. XM radio should not be denied the ability to provide content I can use. Aside from the free speech issue please consider.

1. XM radio is far better reception than I can get from local radio. Local stations are not always coming in clearly.

2. XM radio provides exactly the information and content I need when I need it. I am not forced to wait up to half an hour to get information from local radio, information that may not be specific enough for my needs.
